

THREE'S COMPANY

The new Tri-Sport Mini Net System from **Sports Imports/Senoh Volleyball** allows for the playing of three sports: mini-volleyball, badminton and pickleball. The lightweight net system is designed for fast height changes and eliminates the need for heavy and awkward wheel-based systems that are difficult to transport and store. The system weighs 18 pounds and uses in-ground floor sleeves.

VERSATILE TILES

The Contender line of fusion-bonded modular tiles from Everlast Sports Surfacing — manufactured in the United States by **ECORE International** — offers a textured flooring solution for health and fitness spaces exposed to high

traffic volumes. The surface contains 98 percent post-consumer recycled content and features a fiber wear layer and recycled rubber backing fused together using patent-pending itstru Technology developed by Ecore. For the initial launch, Contender is comprised of the Fit, Flex and Strongman series, each with a distinct wear layer texture to enable versatile design and accommodate various functional needs. The tiles come in a variety of colors and sizes.
